EXECUTIVE OFFICE OF THE PRESIDENT
NATIONAL AERONAUTICS and SPACE COUNCIL
WASHINGTON

EXECUTIVE SECRETARY

October 5, 1962

Dear Charles:

I have begun to get inquiries from the press, asking me to verify the report that the Space Council has engaged a ~~study~~ *study* ~~headed by Dr. Werners~~ *headed by Dr. Werners to find out whether and where we* should go to the moon. This has caused me some embarrassment as it looks as if we had some doubt regarding the decision which has already been made by the President. I have denied that any such contract has been made.

This development has necessitated further thinking about the proposal. I will be in touch with you soon, so that we can talk about it.

Personal regards.

Sincerely,

E. C. Welch

Mr. Charles Tyroler, II
Executive Vice President
